

Akash Verma

Full Stack Software Engineer

engineer.akash.verma@gmail.com | +91 78318 36353 | Hyderabad, India (Open to Delhi NCR & Remote)
[LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Engineer with 4.5+ years of experience designing and developing scalable web applications and enterprise platforms. Proven expertise in .NET Core, Angular, React, SQL Server, and collaborative Agile development environments. Strong background in driving architectural improvements, debugging complex distributed systems, and designing highly reusable UI components.

TECHNICAL SKILLS

- **Languages & Backend:** C#, .NET Core, ASP.NET MVC, Web API, EF Core, Blazor, gRPC, SignalR, JWT
- **Frontend & UI:** Angular, React, JavaScript, TypeScript, HTML5/CSS3, Angular Material, Kendo UI, Bootstrap
- **Cloud & DevOps:** AWS, Docker, Kubernetes, CI/CD
- **Databases:** MS SQL Server, T-SQL, Transactions, Query Optimization, Indexing
- **Architecture & Design:** Microservices, Distributed Systems, Saga Pattern, SOLID Principles, Agile/Scrum
- **Monitoring & Testing:** Prometheus, Grafana, Loki, Jaeger, xUnit, NUnit

WORK EXPERIENCE

Advanced Software Engineer | *Intelliflo Software India Pvt. Ltd.* **Nov 2023 – Present**

- **Technical Excellence:** Deliver high-quality, production-ready code with minimal defects by implementing rigorous testing and code quality standards.
- **Agile Leadership:** Actively engage in Scrum and Program Increment (PI) ceremonies, driving alignment and predictability across development cycles.
- **Full-Stack & Cloud Architecture:** Leverage robust experience across monolithic architectures, modern front-ends, and distributed microservices utilizing Docker, Kubernetes, and AWS.
- **AI-Driven Productivity:** Optimize the development lifecycle by applying Claude Code best practices to maximize engineering efficiency and minimize token costs.
- **Collaboration & Mentorship:** Foster a high-performing engineering culture through active cross-team collaboration and dedicated peer support.

Sr. Software Developer | *Joenish Tech Pvt. Ltd.* **Aug 2022 – Nov 2023**

- **End-to-End Ownership:** Led the full-stack development of an enterprise supermarket chain management platform, independently architecting and delivering three major business-critical modules.
- **Technical Leadership & Quality:** Mentored junior engineers and established rigorous code review practices, significantly driving up team productivity and code quality.
- **Full-Stack Delivery:** Developed and optimized scalable frontend and backend solutions utilizing a modern stack of Angular, Blazor, .NET Core, and SQL Server.
- **Cross-Functional Collaboration:** Collaborated closely with cross-functional teams to design, integrate, and deploy advanced system features.

Junior Software Engineer | *Ariel Software Solutions* **Oct 2021 – Aug 2022**

- **Production Ownership:** Assumed full independent ownership of two live production applications immediately following onboarding, ensuring high availability and operational stability.
- **SEO Optimization:** Enhanced search engine visibility and discoverability by architecting and implementing structured data utilizing JSON-LD schemas.
- **Production Engineering:** Spearheaded critical production bug fixes and delivered seamless end-to-end backend and frontend feature enhancements.
- **Performance Tuning:** Optimized complex database queries and refined application logic to significantly reduce latency and improve overall system performance.

KEY PROJECTS

Intelligent Office (iO)

SaaS-based Business & Financial Management Platform

Architected and developed enterprise-grade workflows for a distributed wealth management platform to automate financial advisory and portfolio operations.

- Developed scalable, resilient microservices utilizing C# and .NET Core deployed across Kubernetes and AWS.
- Implemented the **Saga Pattern** to ensure eventual consistency and distributed transaction reliability across microservices.

Technologies: .NET Core, C#, Microservices, Saga Pattern, AWS, Kubernetes, SQL Server, EF Core.

Publix Platform

Enterprise Supermarket Chain Management System

Assumed end-to-end full-stack ownership for the design, development, and delivery of three major, business-critical modules.

- Standardized application architecture by building a library of reusable UI components using Angular and Kendo UI, cutting frontend development overhead.
- Designed robust backend APIs and optimized relational database schemas in SQL Server.

Technologies: Angular, Kendo UI, .NET Core, SQL Server.

Analog Devices (via Infosys)

PCB B2B E-Commerce Platform

Spearheaded backend engineering initiatives to modernize catalog workflows and purchasing transactions for a high-traffic electronic components platform.

- Engineered secure, high-performance data pipelines and enterprise content management systems using Sitecore and .NET Framework.
- Streamlined complex B2B transaction flows, reducing friction in the user checkout funnel.

Technologies: .NET Framework, Sitecore, SQL Server.

FriendBee & Rex London Trade

Social Networking & Retail Platforms

Independently managed and enhanced live production features across high-growth consumer-facing applications.

- Significantly boosted search engine discoverability and organic traffic by architecting structured data with **JSON-LD schema** implementations.
- Conducted deep database performance tuning, refactoring legacy queries to drastically minimize system latency.

Technologies: .NET Core, SQL Server, SEO (JSON-LD).

EDUCATION

Bachelor of Computer Applications (BCA) | Himachal Pradesh University, Shimla

2018 – 2021
